(四) 檢索指令

利用 Advanced Search 模式中的 Keyword 檢索時，可以善用下列檢索指令增加資料查詢的完整性。

1. Truncation and Wild Cards 串字及切截字（萬用字元的運用）

✓ 無限制切截字：「\$」

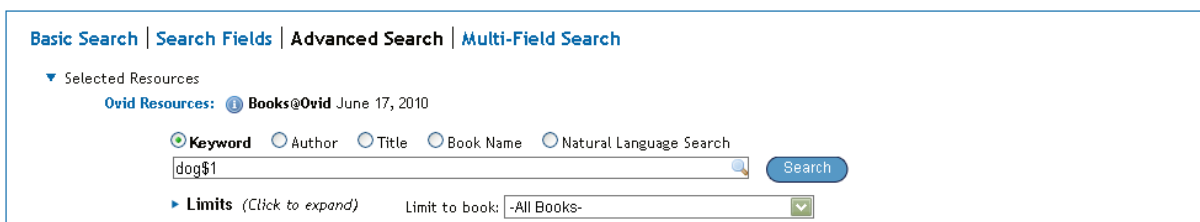

The screenshot shows the Ovid Advanced Search interface. The 'Keyword' search type is selected. The search term 'interest\$' is entered in the search box. The 'Limits' section shows 'Limit to book: -All Books-'. The 'Search' button is visible.

除了 interest 之外，還可以檢索到 interests、interested、interesting 等。

✓ 有限制切截字：

使用者也可以在「\$」之後輸入可接受查詢最大數量的數字。例如查詢「dog\$1」，

The screenshot shows the Ovid Advanced Search interface. The 'Keyword' search type is selected. The search term 'dog\$1' is entered in the search box. The 'Limits' section shows 'Limit to book: -All Books-'. The 'Search' button is visible.

如此，就可以找到 dog、dogs，而不會找到 dogma。

2. Query and Operators 布林邏輯及運算元

✓ OR

聯集兩個或更多檢索款目（項次）成為一個檢索項次，而此項次包含其中的任何一個檢索款目（項次）。例如 *heart attack OR myocardial infarction*，

The screenshot shows the Ovid Advanced Search interface. The 'Keyword' search type is selected. The search term 'heart attack OR myocardial infarction' is entered in the search box. The 'Limits' section shows 'Limit to book: -All Books-'. The 'Search' button is visible.

這樣就會找到有 heart attack OR myocardial infarction 的資料。

✓ AND

交集兩個或更多的檢索款目（項次）成為一個檢索項次，在此檢索項次所找到的任何檢索結果都必須同時包含所有交集的款目（項次）內容。例如 *hypertension And Stroke*，

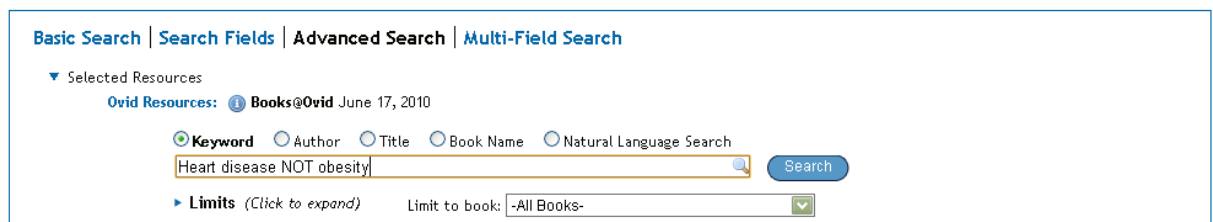

The screenshot shows the 'Basic Search' tab selected. Under 'Selected Resources', 'Ovid Resources: Books@Ovid June 17, 2010' is listed. The search type is 'Keyword'. The search field contains 'hypertension And Stroke'. The 'Limits' section shows 'Limit to book: -All Books-'.

表示檢索之結果需同時包含 *hypertension* 和 *stroke* 這兩個檢索款目。

✓ NOT

兩個款目（項次）的差集在成為另一個檢索項次，此時新的檢索項次查詢所得的結果為在包含前項檢索款目（項次），但不包含後者檢索款目（項次）。例如 *heart disease NOT obesity*，

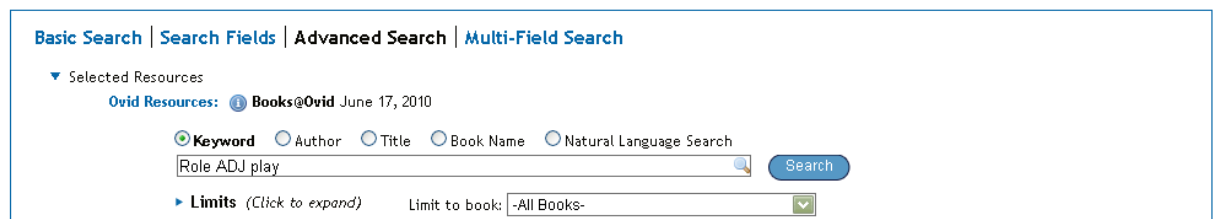

The screenshot shows the 'Basic Search' tab selected. Under 'Selected Resources', 'Ovid Resources: Books@Ovid June 17, 2010' is listed. The search type is 'Keyword'. The search field contains 'Heart disease NOT obesity'. The 'Limits' section shows 'Limit to book: -All Books-'.

表示找到的文獻中需包含 *heart disease* 但沒有 *obesity*。

✓ ADJ

放在指令列上的兩個或更多款目之間的指令，中間除了 stopwords 之外，其他字都不需要放入，而且款目間的前後次序不可對調。例如 *role ADJ play*，

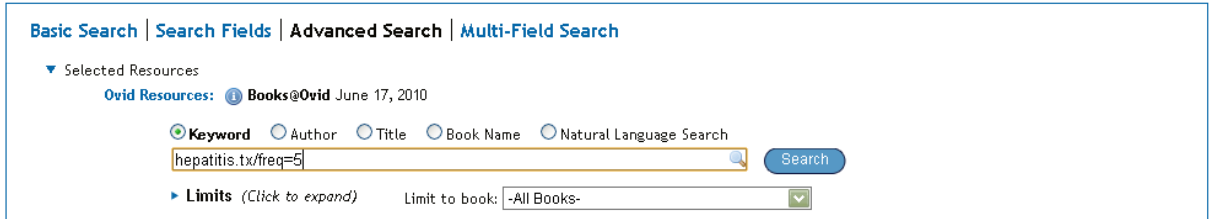

The screenshot shows the 'Basic Search' tab selected. Under 'Selected Resources', 'Ovid Resources: Books@Ovid June 17, 2010' is listed. The search type is 'Keyword'. The search field contains 'Role ADJ play'. The 'Limits' section shows 'Limit to book: -All Books-'.

就會找到有「*role play*」這個詞彙的文獻。

✓ FREQ

通常在全文檢索時可以提供很大的幫助。Freq 是查詢檢索款目出現的頻率，其指令語法為 X.fd/freq=n；其中 X 是檢索款目，fd 表示檢索的欄位，n 是指出現的頻率。例如 hepatitis.tx/freq=5

The screenshot shows the Ovid search interface. At the top, there are tabs for 'Basic Search', 'Search Fields', 'Advanced Search', and 'Multi-Field Search'. Below these, there is a section for 'Selected Resources' with a dropdown arrow. Under 'Ovid Resources', it shows 'Books@Ovid' with a date of 'June 17, 2010'. The search type is set to 'Keyword' (indicated by a radio button). The search bar contains the query 'hepatitis.tx/freq=5'. To the right of the search bar is a 'Search' button. Below the search bar, there is a 'Limits' section with a dropdown arrow and a 'Limit to book:' dropdown menu set to '-All Books-'.

表示查詢在全文欄位（tx）中，hepatitis 至少出現 5 次以上的所有文獻。（只適用於單一欄位查詢）。

GENITOURINARY TRACT INFECTIONS

Thomas T. Ward
Stephen R. Jones

Urinary tract infections (UTIs) are the most prevalent infection of adults for which antimicrobials are used. UTIs are most often an infection of otherwise healthy people and usually are treated on an outpatient basis. In the United States, symptoms of dysuria, urgency, or frequency result in three to four clinic visits per 100 women, and 80% or more of such episodes lead to the use of laboratory tests or to the prescription of drug therapy, or both. In addition to the inconvenience and cost posed by UTIs, infections occasionally result in protracted illness and serious disease, including gram-negative sepsis and death.

儲存檢索策略是一種幫助使用者在下次檢索時，不用再次輸入每一個檢索內容。使用者有二種檢索策略的儲存方法：暫時性儲存、永久儲存。

The screenshot shows the OvidSP search interface. At the top, there are logos for Wolters Kluwer Health and OvidSP. The user is logged in as Andrew Liu. Below the logos, there are navigation links: 'Return to previous version', 'My Account', 'Admin Tools', 'Help', and 'Logoff'. The main navigation bar includes 'Search', 'Journals', 'Books', and 'My Workspace'. The 'Search' tab is active. Below the navigation bar, there is a search form with fields for 'Search Name', 'Comment', and 'Type'. The 'Type' dropdown menu is open, showing options: 'Permanent', 'Temporary (24 hours)', 'Permanent', and 'My Projects'. A 'Save' button is next to the form. Below the form, there is a section titled 'Existing Saved Searches' which is currently empty. At the bottom, there is a message: 'No Saved Searches Exist'. The footer contains copyright information and links to 'Terms of Use', 'Support & Training', 'About Us', and 'Contact Us'.

1. Temporary (24 hours)暫時性儲存

提供使用者在暫時離線時，可以將先前之檢索策略暫時儲存起來，以供未來 24 小時內再度開始使用資料庫時所需。儲存 24 小時之後，系統將自動清除此檢索策略。

2. Permanent 永久儲存

提供使用者可將研究主題的檢索策略永久儲存起來，以供未來查詢相關主題時可以不用重複輸入每一個主題的檢索內容。除非使用者自行將它刪除，否則檢索結果將永久儲存在系統中。

備註：個人帳號(Personal Account)之申請
