About Palgrave Macmillan

Palgrave Macmillan is a global academic publisher, serving learning and scholarship in higher education and the professional world. We publish textbooks, journals, monographs, professional and reference works in print and online. Our programme focuses on the Humanities, the Social Sciences and Business.

As part of the Macmillan Group, we represent an unbroken tradition of 150 years of independent academic publishing, continually reinventing itself for the future.

Our goal is to be publisher of choice for all our stakeholders- for authors, customers, business partners, the academic communities we serve and the staff who work for us. We aim to do this by reaching the maximum readership with works of the highest quality.

For the authors, learned societies, academic organisations, and customers with whom we work:

- We offer a unique breadth of experience, giving a full international publishing service to communities we work with- spanning textbooks, scholarly books, and journals, print and online.
- We have the resources of our large parent organisation, but combine this with the more intimate feel of a small company- personal, flexible, and responsive.
- We recognize the importance of partnerships to our business success, and combine a culture of service with high standards of professionalism.
- We combine creativity with efficiency, and innovation with appropriate, cost-effective, and timely action.
- We have the stability of ownership and the dedicated staffing to build long-term, productive relationships.

For staff and prospective staff:

- We believe that the success of the business and individual personal fulfilment must go hand in hand.
- We foster a culture of challenge.

We believe that a key element in motivating staff is to help them learn and develop.

- We recognise that our organisation is effective through its teamwork, enabling each individual to contribute to the maximum

Search

1. Quick Search

The quick search box at the top-left of the page is the easiest way to search. Enter a book title, author or ISBN you are interested in and press return or hit the search button. Do not include any dashes in the ISBN. If you have a DOI for a title, this is made up of the ISBN for the ebook and a prefix. Select the 13-digit number beginning "978" and use as above.

The default search functionality is OR, meaning that the search results will include books that any of the terms in your search, but not necessarily all of them, or in the order you have typed them. To search for an exact match, use double quote marks around the phrase, as this will return titles containing the exact character string.

2. Advances Search

You can find the advanced search form using the link below the quick search box.

The advanced search form allows you to search in the following fields:

- Title
- Author/Editor
- Full text field
- Keyword Search (search catalogue only)
- Print publication date
- Upload date
- ISBN
- Collection
- Subject
- Subject subcategories
- Series
- Filter by Access

You can use combinations of more than one field to narrow searches to being more specific.

'Title' field

This field searches for the books with the search term in the title or subtitle. You can search the data in three ways:

- (1) All words - the search results will include books that contain all of the terms in your search, but not necessarily in the order you have typed them
- (2) Any words - the search results will include books that contain any of the terms in your search, but not necessarily all of them, or in the order you have typed them
- (3) Exact phrase - the search results will only include books that contain the phrasing as entered, so if you are unsure of the exact title select one of the other options

Searching for *Making History Then and Now* will return no results as the correct book title is

Making History Now and Then. If you search for just *Making History* the correct book appears as the first line in the search results.

(1) All words - will return one result: *Making History Now and Then*

(2) Any words - will return results including titles containing the words "making" or "history" (the search function ignores common words and characters such as "then", "now" and "and")

(3) Exact phrase - will return no results as the correct book title is *Making History Now and Then*. If you search for just *Making History* the correct book appears as the first line in the search results.

'Author/Editor' field

If you know the name of the author or editor of the book you are searching for, you can use this field. You can search the data in three ways:

(1) All words - the search results will include books that contain all of the names in your search, but not necessarily in the order you have typed them

(2) Any words - the search results will include books that contain any of the names in your search, but not necessarily all of them, or in the order you have typed them

(3) Exact phrase - the search results will only include books that contain the phrasing as entered, so if you are unsure of the exact author name(s) select one of the other options

For example:

Searching for *Andrew Smith*

(1) All words - will return titles including the names Andrew and Smith in the author field i.e. if a book was by Andrew Jones and Mark Smith it would be included in the results.

(2) Any words - will return results including titles containing either of the words "Andrew" or "Smith" e.g. a book by Andrew Jones and a book by John Smith

(3) Exact phrase - will return only results containing the exact author name "Andrew Smith". If the book has multiple authors/editors, do not use this option as "Andrew Smith Jeff Wallace" would return no results, as there is no single author called Andrew Smith Jeff Wallace.

'Full text' field

You can use this field to locate books with references to a particular keyword in either their title information (i.e. title, subtitle, description etc) or content. For example, typing in the keyword money will list all books containing this search term within their content as well as their title record. You can search the data in three ways:

- (1) All words - the search results will include books that contain all of the words in your search, but not necessarily in the order you have typed them
- (2) Any words - the search results will include books that any of the words in your search, but not necessarily all of them, or in the order you have typed them
- (3) Exact phrase - the search results will only include books that contain the phrasing as entered, so if you are unsure of the exact phrase you are looking for select one of the other options

For example:

Searching for *money in developing countries*

- (1) All words - the search results will include books that contain the words "money", "developing", and "countries" but not necessarily in that order
- (2) Any words - the search results will include books contain the word "money" or "developing" or "countries"
- (3) Exact phrase - the search results will only include books that contain the exact phrase "*money in developing countries*"

'Keyword' field

This field can be used to locate books with references to a particular keyword in their title information (i.e. searching their title, subtitle, author, description and table of contents as well as other data fields not included on the catalogue page). For example, typing in the keyword *money* will list all books containing this search term within their title record, but not if the content itself contains the word *money*. You can search the data in three ways:

- (1) All words - the search results will include books that contain all of the words in your search, but not necessarily in the order you have typed them
- (2) Any words - the search results will include books that any of the words in your search, but not necessarily all of them, or in the order you have typed them
- (3) Exact phrase - the search results will only include books that contain the phrasing as entered, so if you are unsure of the exact phrase you are looking for select one of the other options

For example:

Searching for *money in developing countries*:

- (1) All words - the search results will include books that contain the words "money", "developing", and "countries" but not necessarily in that order
- (2) Any words - the search results will include books contain the word "money" or "developing" or "countries"
- (3) Exact phrase - the search results will only include books that contain the exact phrase "*money in developing countries*"

'Print publication date' and 'Upload date' fields

If you wish to view titles published in a certain period, or that were uploaded to the Palgrave Connect platform at a particular time, then use these fields to select the date range you wish to search on.

Publication Date ranges must be selected in logical order, thus the "from" date must be earlier than the "to" date, and not the other way round: this will return 0 results.

To search for titles published in a single month, you need to enter the month required as the "from" date and the following month as the "to" date. For example, putting a "from" 08/2008 and "to" 09/2008 will return details of all titles published in August 2008. To search for titles published within a year, you need to enter January of the year required in the "from" field and January of the following year in the "to" field. For example, putting "from" 01/2008 and "to" 01/2009 will return all titles published in 2008, but putting "from" 01/2008 and "to" 12/2008 will return titles published from January-November 2008.

If you leave the "to" date box blank, the results will include all titles published after the first date entered. The "from" field must always be completed for the search to function.

'ISBN/DOI' field

ISBN (International Standard Book Numbering) is the standard way of differentiating book titles from each other. ISBNs are composed of 13 digits e.g. 9780333668529 or 978-0-333-66852-9. If you know the ISBN of a book, use this field to locate the book simply by typing in the 13 digit number. You can either enter the ISBN for the print version or ebook version you are looking for and it will retrieve the relevant ebook record.

Each ebook title also has a DOI (digital-object identifier), which identifies its location on the internet. If you know the DOI of the book you require, you can also search by this by inputting it into this field.

'Collection' drop downs

All titles on Palgrave Connect are part of a collection. If you want to locate books within a particular collection, use this drop-down list to find the name of the collection. 15

'Subject' and 'Subject subcategories' drop downs

These can be used on their own or to search for a keyword in a subject classification. These are key subject areas as defined by Palgrave Macmillan, and relevant subcategories. You can search using just the "subject" drop down, or both together.

For example, selecting the option "economics" will return titles within the economics classification. The "subject subcategories" can be used to further refine the search; for example, "economics" and then "macroeconomics".

If you select an option from the "subject subcategories" list then the "subject" field will automatically be filled.

Searching using these classifications often brings back results across a range of collections as many books are multi-disciplinary.

'Series' drop downs

Some books are part of a series, for example the Economics Today series. If you want to locate books within a series use this drop-down list to find the name of the series.

'access' field

You can limit the search to include only titles to which you have subscriber access. However, please note that you need to be authenticated on your network for this to work.

Search Result

The search results page shows a list of titles that matched your search. You can move through the pages of results with the page numbers and next/previous links.

The title of each result links to the catalogue page for that book.

Full text search results will include a snippet of the text for each title on the search results page. This snippet shows the context in which the search term was found within the ebook, and a 'Browse inside' link after the snippet opens the ebook at the page on which the search term was found.

For titles where the full text search term was found on multiple pages a 'more results' link will be available – this displays up to 5 snippets of text for each title on the search results page. To hide the extra snippets for a title click 'fewer results'

You can sort results by Author Surname, Title, Collection, Relevance, Access, Print Publication Date and Upload Date.

If you are searching within a collection, then "filter by access" is not relevant as access to Palgrave Connect is by collection. For example, if you are searching in the 16

History 2008 collection and you do not have access, "filter by access" will remove all the search results.

If you select "filter by access" and then sort the results again, only the titles to which you have access will be sorted.

"Modify search" will take you to the advanced search form and include the terms by which you have already been searching

"Contract all" will exclude the jacket image of the book.

You can export any page of the search results into an csv file for future reference.
